Street Address of instalation _____

PO Box _____

City, State & State _____

Email Address _____

Description of proposed culvert installation. _____

Regulated and enforced by Ordinance adopted March 11, 2003.

All culvert installations shall be subject to the approval of an authorized representative of the Town of Fordoche, and the prescribed regulations shall apply to all culverts that are installed in the Town of Fordoche. The Town Council shall approve culverts over 22 feet in length or any other variance to this ordinance.

Generally, the minimum size of all culverts installed in drainage ditches in the Town of Fordoche shall be eighteen inches (18") in diameter if galvanized, steel, or approved plastic. An opening or catch basin equivalent to the culvert size shall be installed for every fifty (60) linear feet of culverts installed in drainage ditches.

Specifically, all proposed sites will be evaluated by an authorized representative of the Town of Fordoche and the appropriate size and specifications will be made by such representative. Any deviation from the specification will result in the removal of the culvert at the owners expense.
