

POINTE COUPEE PARISH MOSQUITO

Our updated website allows residents to submit mosquito service requests directly to the parish contractor. Just scroll down the homepage at www.pccparish.org and click on the mosquito control button.

You can also reduce the mosquito population by:

- Draining anything that might collect water.
- Keeping your lawn mowed to reduce resting sites.
- Filling in any low spots in your yard that might hold water.
- Flushing bird baths at least once a week.
- Removing vegetation and debris from ditches.
- Keeping pools clean and in operating condition.
- Cleaning ponds and stocking with minnows
